EDUCATION

Ladoke Akintola University of Technology (LAUTECH)

2020 – 2025

Bachelor of Technology in Cybersecurity, Second Class Upper Honours

CGPA: 4.30 / 5.00

- Final Year Research Project: SDN-Based IoT Security Monitoring with AI/ML; designed and implemented a Software-Defined Networking framework integrating unsupervised machine learning for real-time anomaly and intrusion detection on resource-constrained IoT devices.
- Relevant coursework: Network Security, Cryptography, Digital Forensics, Ethical Hacking, Operating Systems Security, Risk Management, Algorithms.

RESEARCH EXPERIENCE

Independent Research

2024 – 2025

SDN-Based IoT Security Monitoring with Unsupervised ML

Lautech, Nigeria

- Designed a Software-Defined Networking (SDN) framework using OpenFlow and Ryu controller to monitor real-time traffic across simulated IoT device networks.
- Implemented and evaluated autoencoder and isolation forest models for anomaly detection on telemetry streams, comparing detection accuracy and overhead against baselines.
- Findings directly inform current research direction in in-network security measurement for converged IT/OT critical infrastructure.

PUBLICATIONS AND MANUSCRIPTS

[1] P. A. Ige, "Cybersecurity Debt in AI-Augmented Small and Medium Enterprises," manuscript under review, FUOYE Journal of Engineering and Technology, 2026.

[2] P. A. Ige, "Behavioral Analysis of Malware in a Controlled Virtual Environment: A Case Study Approach," preprint, Zenodo, 2026. DOI: 10.5281/zenodo.20736284

WORK EXPERIENCE

Cybersecurity Analyst

September 2025 – Present

TalixMan Group

Dakar, Senegal

- Design, deploy and operationalise Wazuh-based SIEM infrastructure, including custom decoders, detection rules, and containerised log collection pipelines for monitoring enterprise critical systems.
- Correlate and triage security events from network and endpoint telemetry; produce structured incident reports for organisational response workflows.

- Conduct penetration tests, vulnerability assessments, and security audits; configure and maintain SIEM, EDR, firewalls, and IDS/IPS.

Cybersecurity Specialist and Trainer

April 2025 – July 2025

CyberTech Nexus

Nigeria

- Performed risk assessments and vulnerability testing to identify security gaps across client environments.
- Designed and delivered workshops and webinars on IT security, risk management, and network protection to 30+ industry professionals.

Penetration Tester Intern

August 2024 – November 2024

HackersDaddy

Nigeria

- Executed web application and network penetration tests using Burp Suite, Metasploit, and custom tooling; developed proof-of-concept exploits.
- Produced detailed remediation reports with prioritised, actionable recommendations for client security teams.

TECHNICAL PROJECTS

CTF Challenge Developer and Azure Administrator

January 2023 – Present

Independent Project

- Designed and hosted CTF challenges on Microsoft Azure spanning web exploitation, binary exploitation, and reverse engineering for 50+ participants across multiple live competitions.
- Developed an 8-week cybersecurity course covering AES decryption, visual cryptography, and binary exploitation.
- Ranked Top 1% globally on TryHackMe and Hacker level on HackTheBox.

CERTIFICATIONS

- HTB Certified Penetration Testing Specialist (CPTS) - HackTheBox
- Certified Red Team Analyst (CRTA)
- Certified AppSec Practitioner (CAP) - SecOps Group
- Certified Network Security Practitioner (CNSP) - SecOps Group
- ISO/IEC 27001 Information Security Management

TECHNICAL SKILLS

- Programming and Scripting: Python, C, Bash
- Cloud Platforms: Microsoft Azure, AWS
- Security Tools: Wazuh SIEM, EDR, IDS/IPS, Burp Suite, Metasploit, GDB, pwntools, Nmap, Wireshark
- Networking: SDN/OpenFlow, network traffic analysis, packet processing, eBPF/XDP

- Competencies: Penetration Testing, Vulnerability Assessment, Reverse Engineering, Binary Exploitation, Incident Response, Threat Intelligence, SIEM Engineering
- Languages: English (Fluent), French (Intermediate)

AWARDS AND COMPETITIONS

- 1st Place — ECOWAS Hackathon CTF 2026 (Regional Champion, representing Nigeria)
- 1st Place — NCSC 2025 Hackathon CTF, Nigeria (National Champion)
- 1st Place — Africa CyberFest24 CTF 2024
- 3rd Place — ECOWAS Hackathon CTF 2024 | 3rd Place; ECOWAS Hackathon CTF 2023
- 2nd Place — ECOWAS Hackathon CTF 2022 | 2nd Place; Diaries of Hackers (NG) CTF 2022
- 3rd Place — UrchinSec Cyber Aware 2024 CTF
